Q1	Select the chapter you want to provide feedback on
	General Rural Zone
Q2	In general, to what extent do you support the contents of this chapter?
	Agree
Q3	Objective/Policy/Rule/Standard reference:
	I would like to see the Rural Zones Introduction on page 522 paragraph 3 changed to exclude the words "...and, in many cases devalued.."
Q4	Feedback/Comments
	This is a very subjective statement that does not need to be incorporated into what is otherwise a fact based introduction.
Q5	Objective/Policy/Rule/Standard reference:

Q1	Select the chapter you want to provide feedback on
	Earthworks
Q2	In general, to what extent do you support the contents of this chapter?
	Agree
Q3	Objective/Policy/Rule/Standard reference:
	EW-R2
Q4	Feedback/Comments
	I would like to see the addition of permitted activities to include: effluent ponds, water storage ponds and sediment trap ponds. I would also like to see some clarity around what non-system irrigation infrastructure is. If this is trying to distinguish between an irrigation scheme's infrastructure and what infrastructure is on-farm then perhaps a definition needs to be included. Having said that I don't see the need to distinguish between the two and perhaps just delete the words "non-system".

Q1	Select the chapter you want to provide feedback on
	Part 1 - Introduction and General Provisions
Q2	In general, to what extent do you support the contents of this chapter?
	Agree
Q3	Objective/Policy/Rule/Standard reference:
	Definitions; Agricultural intensification
Q4	Feedback/Comments
	This definition needs some more clarity. The definition does not include dryland farming yet dryland farming can include all of the activities listed apart from irrigation. Furthermore I don't know how you can change the feed type without direct drilling, cultivation or oversowing. If the idea of the relevant rule is to protect sensitive zones then allowing an increase in stocking rates or stock class could have just as much impact as cultivation or direct drilling.

	Agree	
Q3	Objective/Policy/Rule/Standard reference:	
	EW-R3	
Q4	Feedback/Comments	
	Would like to see the maximum track width changed from 3 metres to at least 4 metres. A standard farm track is usually as wide as a standard gate width which is 4.26 metres wide. Dairy farm cow lanes would be wider still at more like 6 metres.

Q1	Select the chapter you want to provide feedback on
	Natural Features and Landscapes
Q2	In general, to what extent do you support the contents of this chapter?
	Neutral
Q3	Objective/Policy/Rule/Standard reference:
	ONF053
Q4	Feedback/Comments
	A number of properties or parts of properties have the overlay ONF053 (Waitaki River). The land included in this overlay is mostly highly intensified pastoral land use and it seems at odds with the description of the ONF that this would be included. The ONF053 boundary should be pushed back towards the Waitaki River to exclude the already highly modified private property.
