### **Critical infrastructure Systems**

- What fire suppression systems do you have in place for your electrical infrastructure for water pump stations and treatment plants
- What Fire suppression systems do you have in place for electrical switchboards and MCC rooms.
- **If you have gas flood systems:**
- What gas flood system?
- When is the vessel to be pressure tested in order to retain Building WOF?
- Have they had any false activations? This would require refilling of the pressure vessels.
- Who is the asset manager responsible for protecting your critical infrastructure?

### **Council Officers have reviewed your request and compiled the below response**

Council does not have any fire suppression systems for its electrical infrastructure or switchboards. The Oamaru Opera House has a sprinkler system. However, this is for the whole building. Council also advises that it does not have any gas flood systems.

Yours sincerely,

**Information Management Team**
