### Initial assessment 22 August 2018 to accompany vetting form for Form 9c application

#### **Activities meeting certain requirements are permitted activities**

(1)

An activity is a permitted activity if—

(a)

the activity would be a permitted activity except for a marginal or temporary non-compliance with requirements, conditions, and permissions specified in this Act, regulations (including any national environmental standard), a plan, or a proposed plan; and

The proposed filming activity is for a temporary period only. The Waitaki District Plan does not specifically provide for filming on a temporary basis as a temporary activity, however does provide provisions for temporary activities and assessment matters. Therefore, subject to meeting the tests below, I consider this test to have been met.

(b)

any adverse environmental effects of the activity are no different in character, intensity, or scale than they would be in the absence of the marginal or temporary non-compliance referred to in paragraph (a); and

The proposed filming activity will take place inside an existing building. The activity involves set-up time of the scene (maximum 16 days) and actual filming (over a two day period only). The applicant has proposed to cater for effluent disposal, power, and waste disposal for the period late August to late October 2018. The applicant has advised that there will be 6-8 vehicle movements per day during the set-up time (approximately 16 days), and 2-3 trucks (10 tonne or less) accessing this site over the same period. During shoot days, trucks will be moved in at night between 11 and 13 October – approximately 40-60 truck vehicle movements over the two days; there will be approximately 200 vehicle movements per day arriving between 5am and 7am, departing between 5pm and 7pm. No exterior filming is proposed. The applicant has confirmed that a traffic management company has been hired throughout the entire filming time to manage any adverse traffic effects to and from the site.

(c)

any adverse effects of the activity on a person are less than minor; and

Mitigation measures in (b) above will ensure that the effects on any person will be less than minor.

(d)

the consent authority, in its discretion, decides to notify the person proposing to undertake the activity that the activity is a permitted activity.

**To be completed**

(2)

A consent authority may give a notice under subsection (1)(d)—

(a)

after receiving an application for a resource consent for the activity; or

(b)

on its own initiative.
