Women in Trades Opportunities.

Assets and Operations

We regularly hire for entry level and experienced engineering/project management roles. We are currently advertising for an engineering officer for our roading team, which is aimed at both graduate engineers and those close to the end of their engineering education programme.

It is recommended to get in touch with SouthRoads, Downer and Whitestone Contracting Limited as three local contracting firms that engage people in apprenticeships and graduate programmes. All three of these have women in trade roles, either having graduated from their own training programmes, or are currently engaged in training programmes.

Community Development

We do have a relatively large number of females that we've been working with through MTFJ. They are all offered equal opportunities and there is no differentiation between them and males. Any of the employers in Waitaki would accept a female if they are the suitable candidate for the job. This applies to all the enquiries below.

We do not have a specific programme for females and treat every client individually and create a work plan as per their strengths, weaknesses, abilities & employer needs.

It would be too long a list to outline all the employers we work with in Waitaki.
