To meet the complex and changing future demands the Council needs to create a District Plan that creates an equitable, sustainable, and livable community.

This submission does not address individual sections but recommends that the Council applies the principles of the twenty-minute neighborhood as a starting point to develop a people centric plan. This will allow the development of thriving neighborhoods and contribute to meeting sustainability goals.

The 20-minute neighborhood is all about 'living locally'—giving people the ability to meet most of their daily needs within a 20-minute return walk from home, with access to safe cycling and local transport options<sup>1</sup>.

A twenty-minute neighborhood has: -

- Safe accessible footpaths separated cycling lanes that create opportunities for physical activity and access to public transport.
- Local schools and lifelong learning opportunities, health and social services, employment opportunities.
- A range of affordable, accessible housing types suitable for all ages and stages.
- High quality public green spaces, including: -
  - Streets that are well planted with places to sit and rest.
  - Parks and playgrounds that are accessible and attractive to people of all ages.
  - Community Gardens
- Sports and recreation services that are accessible, that provide a variety of activities and cater for spectators.

Figure one (see following page) summarises the features of a twenty-minute neighbourhood.

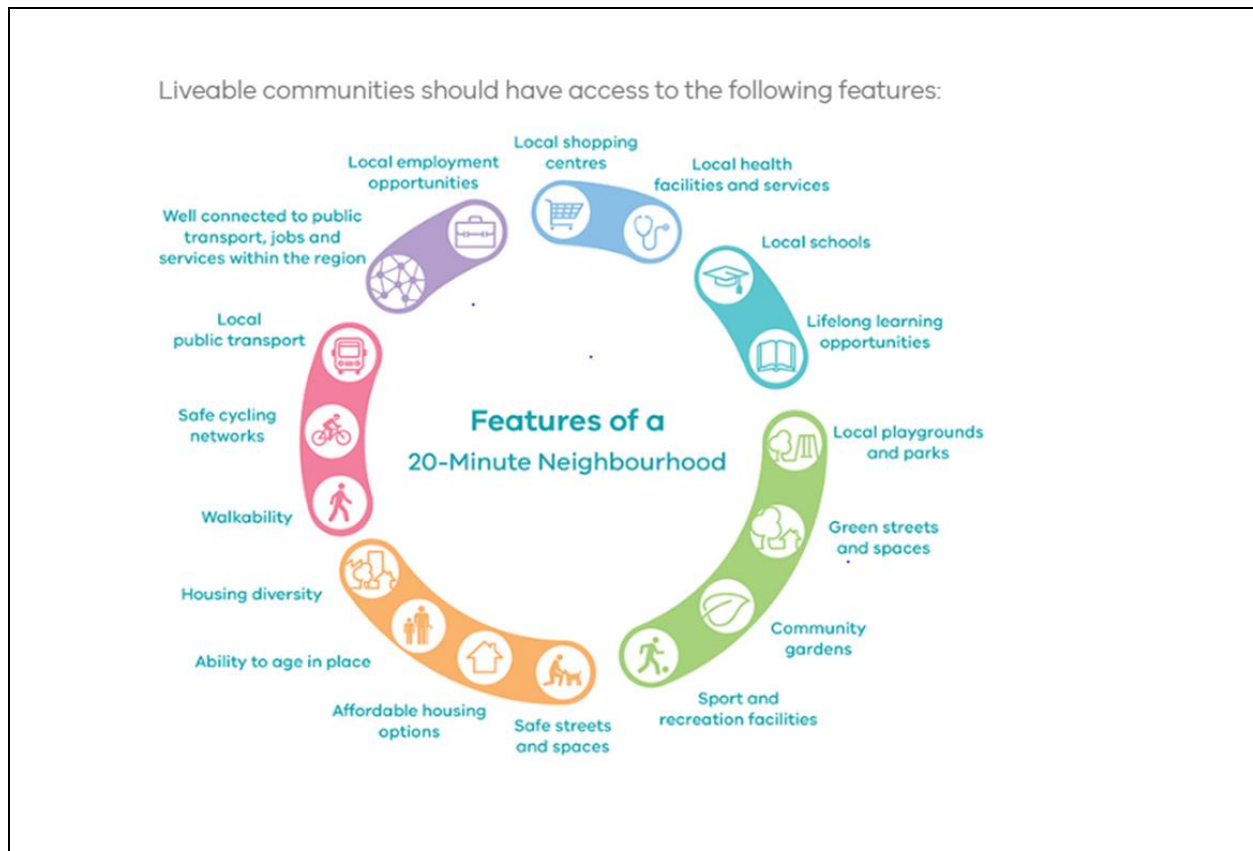

Figure one. Features of a 2 -Minute Neighbourhood<sup>1</sup>.

### To achieve this, we recommend that the Council

- Set high level goals based on the twenty minute neighbourhood for each section of the plan.
- Address inclusion/equity in all community engagement
- Ensure inclusion/accessibility is included, from concept designs, and that plans are reviewed at all stages by relevant professionals e.g., transport engineers, Universal Design advisors/auditors.
- Include accessibility audits during development and construction processes.
