Q 4	Feedback/Comments
	It seems extremely important to make sure that new buildings that are being constructed in the Historic Area are in keeping with the existing buildings. Recent building activity in the lower Tees St area have not added to the historic ambience and affected the views of historic houses behind. Presumably under the new District plan, this would be avoided.

	In order to add more vibrancy to the historic area but not change the facade, could some of the upper levels of the buildings in Harbour St be turned into apartments?

Q 1 2	If you need more space, or have any other general comments, please leave them here
	After reading through some of the District Plan, I have realised that there are elements that are not included that seem very important. For example, in order to lessen the environmental damage of many individual cars, and start tackling climate change, where is the proposal for providing public transport in the Oamaru area?
